

Flow and water purity test

Property address

What tests are you wanting done?

Is there a lender involved?

Vacant or Occupied? Is the power on? Will someone be meeting on-site?
Is the area directly surrounding the well free of any fire hazards?

Is there a UV OR Reverse Osmosis?

If yes, are we taking additional samples after?

Will we have access to all the well and pump equipment, well head, pressure tank, controls, breaker, & filtration? Where is everything located? Are there any gates and are they locked?

Is the well head a pitless or standard? This will determine if we need a boom truck or not.
If pitless how is access for getting a boom truck to the well head (around and above well)?
If unsure you can email me a picture at flowtest@quinnsWell.com and I will figure it out.

PITLESS

STANDARD
